

Leonardo Curaca

Software Engineer with over 5 years of experience in the full web development lifecycle. Expert in designing high-availability solutions with a focus on technical quality and operational efficiency. My priority is developing maintainable code that drives business growth and enhances the end-user experience.

EXPERIENCIA

YesLawyer, New York City (remote) – *Backend Developer*

OCTOBER 2024 – JULY 2025

Payment Systems Re-engineering: Led the redesign and migration of the payment module, integrating an independent, decoupled application that ensures transactions integrity through asynchronous validations with external processors.

Technical Strategy & Leadership: Identified and communicated critical security and maintainability risks to management; proposed a technical roadmap based on industry best practices that optimized revenue flow.

AI Implementations: Integrated OpenAI APIs for automated document analysis and legal workflows, streamlining case file creation and support through specialized chatbots.

Operations & Technical Support: Ensured system uptime in Linux environments managing container deployment and resolving production availability incidents.

Cross-functional Collaboration: Partnered with the infrastructure team on CI/CD monitoring and the management of development and production environments, ensuring stable delivery cycles.

Mentorship: Acted as technical guide for new team members, accelerating their onboarding and alignment with the project architecture.

Share Business, Santiago de Chile (remote) – *Fullstack Developer*

JULY 2021 – JULY 2024

Multi-purpose Solutions: Led end-to-end development of complex digital platforms, including SaaS, E-learning systems, corporate social networks, and eCommerce engines using Python/Django ecosystem.

Lifecycle Management: Responsible for technical project planning – from requirements definition to task allocation and deliverable supervision – ensuring compliance with deadlines and quality standards.

Technical Consulting & Stakeholders: Acted as technical bridge in client meetings, translating business needs into technical specifications and managing expectations through progress presentations and conflict resolution.

Mentoring & Feedback: Fostered professional growth within the technical team through code reviews and constructive feedback, establishing development best practices within the organization.

PROYECTOS

Netzun – Backend Development Instructor (Django)

OCTOBER 2022

Curriculum Design: Created and produced two comprehensive courses (Basic and Intermediate) covering the full Django development cycle, from initial configuration to Testing implementation.

Architecture Mastery: Instructed on the correct use of the Django ORM, the interactive console, and the design of views and forms oriented toward user experience.

Tools Specialization: Deep-dived into Django Admin customization and Generic Class-Based Views.

Mentorship: Provided technical support and troubleshooting for students, improving concept retention and course completion rates.

EDUCACIÓN

Tecsup, Lima – Software Design e Systems Integration

2018 - 2020

HABILIDADES

PYTHON (DJANGO)	JS (REACT, ASTRO)
DRF	POSTGRESQL REDIS CELERY
AWS (EC2, S3, ROUTE53)	DOCKER CI/CD
RAG	CHUNKING OPENAI
SLACK SDK	GOOGLE API
SENTRY	NEW RELIC DATADOG
BOLDSIGN	TWILIO KLAVIYO
FAST LEARNER	CLEAN CODE
PRACTICALITY	ADAPTABILITY
